The AIAA Structures Technical Committee and the Materials Technical Committee are sponsoring a Joint Special Session on

## 3D Woven Composites for Materials and Structures

**AIAA SciTech 2024**

January 8-12, 2024

Orlando, FL

The AIAA (American Institute of Aeronautics and Astronautics) Structures and the Materials Technical Committees solicits papers with recent research, technological advancements, and systems-level perspectives on **3D Woven Composites for Materials and Structures** within the AIAA SciTech conference. It is the intention to examine advances relevant to aerospace materials and structures including:

- Design, analysis, and characterization of 3D woven materials and structures
- Novel manufacturing techniques for 3D woven preforms and composite structures
- New analysis methods for 3D woven material and structural design and evaluation
- Imaging and microstructural evaluation of 3D woven materials and structures
- Novel observations of material and structural response characteristics resulting from mechanical and/or thermal loading
- Process modeling of 3D woven materials and structural components, including weaving, compaction, infusion, and/or cure of 3D woven preforms
- Integration of process and performance predictions of 3D woven composites
- Qualification/certification approaches and challenges for 3D woven materials and structures

The committee welcomes submissions from government, industry, academic, and small businesses. All abstracts will be evaluated by qualified individuals from these sectors.

Extended abstracts of no less than 1,000 words are due **May 25, 2023**

Author notification of paper acceptance on or about **August 25, 2023**

Final manuscript due **December 4, 2023**

Detailed deadline information, abstract preparation instructions, and policies can be found at:

<https://www.aiaa.org/SciTech/presentations-papers/call-for-papers>

**Make sure to select the “3D Woven Composites for Materials and Structures” topic option under “Materials” or “Structures” when prompted during submission.**

The AIAA Structures Technical Committee and the Materials Technical Committee are sponsoring a Joint Special Session on

## Artificial Intelligence and Machine Learning for Materials and Structures

**AIAA SciTech 2024**

January 8-12, 2024

Orlando, FL

The AIAA (American Institute of Aeronautics and Astronautics) Structures and Materials Technical Committees solicit papers with recent research, technological advancements, and systems-level perspectives in **Artificial Intelligence and Machine Learning for Materials and Structures** within the AIAA SciTech conference. Artificial Intelligence and machine learning (deep learning included) technologies offer the potential to revolutionize and streamline current processes to develop and qualify materials and improve our design process for aerospace structures. These sessions will examine applications of various artificial intelligence and machine learning technologies to develop new material further and structural applications and their application to design and qualification/certification. Applications to all aero-structures, aircraft and spacecraft (such as launch vehicles), are welcome.

The committee welcomes submissions from government, industry, academic, and small businesses. All abstracts will be evaluated by qualified individuals from these sectors.

Extended abstracts of no less than 1,000 words are due **May 25, 2023**

Author notification of paper acceptance on or about **August 25, 2023**

Final manuscript due **December 4, 2023**

Detailed deadline information, abstract preparation instructions, and policies can be found at:

<https://www.aiaa.org/SciTech/presentations-papers/call-for-papers>

**Make sure to select the “Artificial Intelligence and Machine Learning for Materials and Structures” topic option under “Materials” or “Structures” when prompted during submission.**

## Design and Analysis of Structures and Materials in Extreme Environments

**AIAA SciTech 2024**

January 8-12, 2024

Orlando, FL

The AIAA (American Institute of Aeronautics and Astronautics) Structures Technical Committee and the Materials Technical Committee are soliciting papers with recent research, technological advancements, and systems-level perspectives on **Design and Analysis of Structures and Materials in Extreme Environments** within the AIAA SciTech conference. It is the intention to examine advances including:

- Special considerations for materials, design, analysis, and testing of structures in extreme environments (e.g. hypersonic; entry descent, and landing; aircraft and rocket engine; space/planetary exploration; and cryogenic applications)
- Design, analysis, and test methods for materials in extreme environments (e.g. additive structures, lattice structures, high temperature composites)
- Design and Analysis methods for combined and/or coupled loads, including modeling, design optimization, and multi-disciplinary analysis (fluid, thermal, and structural interactions; optics; deployable structures)

The committee welcomes submissions from government, industry, academic, and small businesses. All abstracts will be evaluated by qualified individuals from these sectors.

Extended abstracts of no less than 1,000 words are due **May 25, 2023**

Author notification of paper acceptance on or about **August 25, 2023**

Final manuscript due **December 4, 2023**

Detailed deadline information, abstract preparation instructions, and policies can be found at:

The AIAA Materials Technical Committee is soliciting abstracts for a Special Session on

## Fatigue and Fracture

**AIAA SciTech 2024**

January 8-12, 2024

Orlando, FL

The AIAA (American Institute of Aeronautics and Astronautics) Materials Technical Committee solicits papers with recent research, technological advancements, and systems-level perspectives in the domains of **Fatigue and Fracture** mechanics research, development, and application within the AIAA SciTech conference. It is the intention to examine advances including underlying theoretical principles, fundamental improvements to the state of the art in experimental, computational, and/or modeling practices, verification, validation, and uncertainty quantification, standard and nonstandard testing, and additional relevant topics as proposed.

- Durability and damage tolerance
- Material behavior including composites, metals, ceramics, and polymers
- Environmental influences
- Computational and analytical modeling
- Experimental mechanics
- Testing and characterization procedures
- Sustainment and life extension
- Verification and validation
- Post-impact performance
- No-growth and slow-growth design criteria

The committee welcomes submissions from government, industry, academia, and small businesses. All abstracts will be evaluated by qualified individuals from these sectors.

Extended abstracts of no less than 1,000 words are due **May 25, 2023**

Author notification of paper acceptance on or about **August 25, 2023**

Final manuscript due **December 4, 2023**

## High Performance Materials for Extreme Environments

**AIAA SciTech 2024**

January 8-12, 2024

Orlando, FL

The AIAA (American Institute of Aeronautics and Astronautics) Materials Technical Committee solicits papers with recent research, technological advancements, and systems-level perspectives on **Materials for Extreme Environments** within the AIAA SciTech conference. It is the intention to examine advances including:

- Materials for hypersonic applications, especially for use at Mach 10-20
- Modeling, formulation, and processing of materials (metals and composites) for load bearing or pressure vessel applications
- Performance of materials and structures at extreme high and extreme low temperatures
- Materials for emerging entry, descent, and recovery systems & technologies
- Development of thermal and environmental barrier coatings
- Assessment and prevention of materials degradation due to space environment hazards such as ionizing radiation, atomic oxygen, spacecraft charging, and micrometeoroids
- Emerging propulsion systems
- Innovative test methodologies, simulations, and platforms

The committee welcomes submissions from government, industry, academic, and small businesses. All abstracts will be evaluated by qualified individuals from these sectors.

Extended abstracts of no less than 1,000 words are due **May 25, 2023**

Author notification of paper acceptance on or about **August 25, 2023**

Final manuscript due **December 4, 2023**

The AIAA Spacecraft Structures Technical Committee and the Materials Technical Committee are sponsoring a Joint Special Session on

## High Strain Composite Materials and Structures

**AIAA SciTech 2024**

January 8-12, 2024

Orlando, FL

The AIAA (American Institute of Aeronautics and Astronautics) Spacecraft Structures Technical Committee and the Materials Technical Committee are soliciting papers with recent research, technological advancements, and systems-level perspectives on **High Strain Composite Materials and Structures** within the AIAA SciTech conference. It is the intention to cover topics including:

- Analysis, numerical modeling, and experimental characterizations of high strain composite materials
- Material failure, structural instability, and mechanics of high strain composite structures
- Novel structural concepts enabled by high strain composites
- Effects of extreme environments on high strain composite materials and structures
- Any other topics relevant to high strain composites

The committees welcome submissions from government, industry, academic, and small businesses. All abstracts will be evaluated by qualified individuals from these sectors.

Extended abstracts of no less than 1,000 words are due **May 25, 2023**

Author notification of paper acceptance on or about **August 25, 2023**

Final manuscript due **December 4, 2023**

The AIAA Materials Technical Committee and the Digital Engineering Integration Committee are sponsoring a Joint Special Session on

## ICME & the Digital Thread

**AIAA SciTech 2024**

January 8-12, 2024

Orlando, FL

The AIAA (American Institute of Aeronautics and Astronautics) Materials Technical and Digital Engineering Integration Committees are soliciting papers with recent research, technological advancements, and systems-level perspectives that address the various issues associated with capturing, storing, analyzing, and disseminating information, data artifacts, and linkages constituting **the digital thread and integrated computational materials engineering (ICME)** studies within the AIAA SciTech conference. Specifically, papers discussing material data management activities and Machine Learning surrogate models in the context of the required elements associated with digital twins and digital thread will be considered; that is Data, Informatics, and Visualization as discussed in the NASA 2040 Vision (CR 2018-219771). The goal is to provide a forum for discussion of academia, industrial, and government digital thread activities that enable successful implementation of ICME best practices and culture.

The committee welcomes submissions from government, industry, academic, and small businesses. All abstracts are peer-reviewed.

Extended abstracts of no less than 1,000 words are due **May 25, 2023**

Author notification of paper acceptance on or about **August 25, 2023**

Final manuscript due **December 4, 2023**

Detailed deadline information, abstract preparation instructions, and policies can be found at:

<https://www.aiaa.org/SciTech/presentations-papers/call-for-papers>

**Make sure to select the “ICME & the Digital Thread” topic option under “Materials” or “Digital Engineering” when prompted during submission.**

The AIAA Materials Technical Committees is soliciting abstracts for a Special Session on

## Materials for Additive Manufacturing

AIAA SciTech 2024

January 8-12, 2024

Orlando, FL

The AIAA (American Institute of Aeronautics and Astronautics) Materials Technical Committee solicits papers with recent research, technological advancements, and systems-level perspectives on **Materials for Additive Manufacturing** for the AIAA SciTech conference. These sessions will examine advances in Additive Manufacturing, also sometimes known as 3D Printing. Any materials-related aspect of additive manufacturing that is relevant to aerospace is acceptable for papers, including but not limited to:

- Metals and Alloys: Steel, Titanium and Aluminum based alloys, Superalloys, high entropy alloys etc.
- AM for component design: multi-material printing, spatially and functionally gradient designs, etc.
- Computational modeling of AM processes and resulting material properties
- Constitutive models for Additively Manufactured materials
- Multi-scale structural analysis modeling for Additively Manufactured materials
- Design of structures to enable efficient additive manufacturing
- Additive Manufacturing for composites
- Additive Manufacturing for ceramics and refractory materials
- Process monitoring and control methods
- In-space additive manufacturing
- Testing and inspection
- Materials discipline capabilities for certification

The committee welcomes submissions from government, industry, academic, and small businesses. All abstracts will be evaluated by qualified individuals from these sectors. While this session is focused on additive materials and their processing, it should be noted that the Structures Technical Committee also has a related session entitled “Additive Structures” which is focused on structural applications of additive manufacturing. Authors are encouraged to submit their abstract to the most relevant session.

Extended abstracts of no less than 1,000 words are due **May 25, 2023**

Author notification of paper acceptance on or about **August 25, 2023**

Final manuscript due **December 4, 2023**

Detailed deadline information, abstract preparation instructions, and policies can be found at:

<https://www.aiaa.org/SciTech/presentations-papers/call-for-papers>

**Make sure to select the “Materials for Additive Manufacturing” topic option under “Materials” when prompted during submission.**

## Multifunctional Materials for Aerospace

**AIAA SciTech 2024**

**January 8-12, 2024**

**Orlando, FL**

The AIAA (American Institute of Aeronautics and Astronautics) Materials Technical Committees solicit papers with recent research, technological advancements, and systems-level perspectives on **Multifunctional Materials for Aerospace** within the AIAA SciTech conference. It is the intention to examine advances including:

- Area of interest 1: Multifunctional nano-composite materials and applications
- Area of interest 2: Piezoelectric/pyroelectric materials and applications
- Area of interest 3: Piezoresistive/piezoresistance materials and applications
- Area of interest 4: Photo sensitive materials and applications
- Area of interest 5: Temperature sensitive materials and applications
- Area of interest 6: Electroactive/Magneto-active materials and applications
- Area of interest 7: Shape memory materials and applications
- Area of interest 8: Dielectric materials and applications
- Area of interest 9: Self-healing materials and Structures
- Area of interest 10: Any new functional/multifunctional material discoveries

The committee welcomes submissions from government, industry, academic, and small businesses. All abstracts are peer-reviewed.

Extended abstracts of no less than 1,000 words are due **May 25, 2023**

Author notification of paper acceptance on or about **August 25, 203**

Final manuscript due **December 4, 2023**

Detailed deadline information, abstract preparation instructions, and policies can be found at:

## Multiscale Modeling

**AIAA SciTech 2024**

January 8-12, 2024

Orlando, FL

The AIAA (American Institute of Aeronautics and Astronautics) Materials Technical Committee solicits papers with recent research, technological advancements, and systems-level perspectives on **Multiscale Modeling** to be presented in special sessions within the AIAA SciTech conference. It is the intention to examine advances including:

- The development of physics-based multiscale modeling and simulation
- Unique challenges in multiscale modeling
- New or novel techniques for multiscale modeling
- Cross-scale material phenomena investigated by multiscale modeling and simulation
- Uncertainty quantification and model validation in multiscale modeling and simulation
- Integration of experiments and simulations for multiscale modeling
- Micromechanics
- Multiscale modeling of damage, degradation, and failure

The committee welcomes submissions from government, industry, academia, and small businesses. All abstracts are peer-reviewed.

Extended abstracts of no less than 1,000 words are due **May 25, 2023**

Author notification of paper acceptance on or about **August 25, 2023**

## Nanostructured Materials

**AIAA SciTech 2024**

January 8-12, 2024

Orlando, FL

The AIAA (American Institute of Aeronautics and Astronautics) Materials Technical Committee solicits papers with recent research, technological advancements, and systems-level perspectives on **Nanostructured Materials** within the AIAA SciTech conference. It is the intention to examine advances including:

- Hierarchical methods development including molecular simulations
- Process-structure-property relationships
- Performance analysis
- Experimental techniques and characterization
- Multifunctional properties and approaches
- Synthesis and processing of nanostructured materials including additive manufacturing.

Material forms may include but are not limited to: nanowires, nanotubes, nanoparticle and nanofiber reinforced composites and assemblies, coatings, thin films, nanocrystalline metals, nanostructured ceramics, functionally graded materials, and multi-scale hierarchical materials concepts. Of special interest is the development of validated computational and analytical methods that address techniques for bridging length and time scales with the intent of providing efficient, high performance, engineering materials to the aerospace community.

The committee welcomes submissions from government, industry, academic, and small businesses. All abstracts will be evaluated by qualified individuals from these sectors.

Extended abstracts of no less than 1,000 words are due **May 25, 2023**

Author notification of paper acceptance on or about **August 25, 2023**

**AIAA SciTech 2024**

January 8-12 2024

Orlando, Florida

The AIAA (American Institute of Aeronautics and Astronautics) Materials Technical Committee and the Survivability Technical Committee are soliciting papers with recent research, technological advancements, and systems-level perspectives on **Survivable Materials and Structures** within the AIAA SciTech conference. Survivability improvements for air and space systems increasingly rely on the development of new structural designs, which must be lightweight but also satisfy a demanding set of mechanical, thermal, electromagnetic, or other requirements. Topics of interest include but are not limited to design, analysis, modeling, optimization, and/or testing of:

- Novel structural designs for impact mitigation and stress wave management
- Crashworthy structures
- Multifunctional structures for survivability
- Designs that incorporate structural health monitoring or self-healing
- Additively manufactured structural components with properties optimized for specific applications
- Improved ballistic protection systems for rotary-wing aircraft
- Improved thermal protection systems for spacecraft
- Low observability structures
- Thermal protection system materials, including polymer and ceramic matrix composites

The committee welcomes submissions from government, industry, academic, and small businesses. All abstracts are peer-reviewed.

## Testing and Characterization of Materials

**AIAA SciTech 2024**

January 8-12, 2024

Orlando, FL

The AIAA (American Institute of Aeronautics and Astronautics) Materials Technical Committee is very pleased to announce a call for papers to be presented in special sessions on **Testing and Characterization of Materials** within the AIAA SciTech conference. These sessions will examine advances in testing and characterization of materials to be utilized in any aircraft, aerospace, spacecraft, hypersonic, or other vehicle or structure. Any aspect of this broad area relevant to aerospace is acceptable for papers, including:

- Testing and characterization programs, results, or material selection efforts
- Unique challenges in testing and characterization
- New or novel materials testing techniques
- Overview or survey papers addressing available databases or consortiums
- New or novel instrumentation methods or instrumentation applications for new material types
- Extreme environment materials testing or characterization
- Analog or performance testing of materials, even in structural configurations

To this end, the Materials Technical Committee is soliciting papers with recent research, technological advancements, and systems level perspectives in the above areas. The committee welcomes submissions from government, industry, academic, and small businesses.

Extended abstracts of no less than 1,000 words are due **May 25, 2023**

Author notification of paper acceptance on or about **August 25, 2023**

Final manuscript due **December 4, 2023**
