

About X-wave Innovations, Inc.

X-wave Innovations, Inc. (XII) is a Research and Development (R&D) firm dedicated to providing innovative solutions and products for federal and commercial customers in defense, homeland security, transportation, and energy. We conduct both cutting-edge R&D and technology transitioning. From creative solutions to state-of-the-art technologies, we provide our customers with the most effective results today. XII excels in designing, manufacturing, and selling our turn-key solutions to customers. We also provide consulting and development services for public and private entities.

Our competency comes from our talented technical staff who have deep understandings of the complexity of real application environments and the underlying scientific principles in our solutions. XII's team consists of a dedicated team of scientists and engineers from various backgrounds. Our core technologies include:

- **Sensor Technologies**
- **Non Destructive Testing (NDT) and Structural Health Monitoring (SHM)**
- **Signal and Image Processing**
- **Data Analysis and Management Service**
- **Power electronic system and control**
- **Advanced Material Processing**

Our mission is to provide innovative solutions, services, and products for our customers. Our activities in R&D and engineering have created an impressive portfolio of intellectual property which constantly grows. With established partnerships with leading research institutes, universities, and primary commercial companies, together we are able to deliver innovative solutions in a timely manner.
