**Attendee List Policy**

Due to privacy standards and protection of personal information, attendee lists will not be provided to event participants or affiliates. In lieu of this, registered event attendees can use the AIAA Events App to search for individuals by name, company, or in general. These individuals have had the option to opt in (or out) of being searchable in the app, thereby giving their permission to be contacted by another attendee.

Individuals will have access to the AIAA Events App for a limited amount of time. When the app closes post-event, access is no longer granted and the ability to search for individuals is no longer available.

Some events will not have an events app and the option to search the list of attendees will not be available.

**Exhibitor List Policy**

Due to privacy standards and protection of personal information, detailed exhibitor lists will not be provided to event participants or affiliates. In lieu of this, a link to a list of the participating exhibiting companies at the event is available in the exhibitor section of the event website or upon request. This list includes only general information about the company and will direct the individual to their company website for further information.
